LEMO

Expect Success. Spec LEMO®

• **A Global Leader**

Since its beginning in Switzerland in 1946, LEMO® has evolved into a worldwide leader in the design and manufacture of circular connectors, with products sold in more than 80 countries.

Today, LEMO offers a product line for almost any application, from medical equipment to test and measurement instrumentation.

• **LEMO Means "Quality"**

The name LEMO has become synonymous with quality and customer service in the connector industry, setting standards that others strive to meet. Our connectors are designed in an ISO 9001 business environment, ensuring the highest quality products for our customers.

• **LEMO – We Deliver Reliability**

Ask for LEMO connectors for any application where quality, safety and ruggedness are essential; where reliability is critical or where connectors are frequently engaged and disengaged, even in the toughest environments.

LEMO Connectors offer a unique combination of benefits:

Original QUICK-LOK™ push-pull, self-latching system saves space and time while ensuring durable connections.

Precision construction from machined brass, stainless steel or aluminum ensures safety and uniform mating.

Gold plated contacts assure excellent electrical performance.

Collet-type strain relief securely grips circumference of any round cable, protecting connection even under extreme stress.

Bend relief option offers additional cable protection, including color-coding for easy identification.

Custom Design

If we don't have it, we'll build it. Although we offer the most extensive product line in the industry, we understand that some application needs are unique. If we don't have exactly what you need, LEMO will design and build a connector that's just right for your application.

Cable Assembly

Expand the quality of the connector to the cable assembly with our one-stop shop value-added service. LEMO's skilled technicians build and test assemblies to your specifications.

Customer Support

Customer Support when you need it. Only LEMO offers extended customer service hours so you get technical support when you need it. LEMO's Customer Support Team includes in-house Product Specialists, plus a nationwide network of sales representatives and distributors.

● QUICK-LOK™ Push-Pull Self-Latching System

LEMO's Original QUICK-LOK push-pull, self-latching system is renowned worldwide for its easy and quick mating and unmating features. It provides absolute security against vibration, shock or pull on the cable, and facilitates operation in a very limited space, and offers unique advantages for all applications:

Speed – Engage connectors simply and quickly by pushing plugs axially into mating receptacles. Pull on outer shell to remove plug easily.

Space Savings – Just one finger clearance on two sides is needed to engage and disengage connectors, so there's no need to twist or turn a locking ring.

Reliability – Connections are reliable and assured when locking mechanism is engaged.

Ruggedness – Sturdy design, with sealed models to various IP levels.

How QUICK-LOK™ Works

Engaging

QUICK-LOK allows the connector to be mated by simply pushing the plug straight into the receptacle.

Latched

Once firmly latched, connection cannot be broken by pulling on the cable or any other component part other than the outer release sleeve.

Disengaging

When required, the connector is disengaged by a single straight pull on the outer release sleeve. This first disengages the latches and then withdraws the plug from the receptacle.

Key:

Fv = average latching force.
Fd = average unmating force with axial pull on the outer release
Fa = average pull force with axial pull on the collet nut.

Latching Characteristics for B, S, 2C and 2G Series Connectors

Force (N)	Series							
	00	0B	1B	2B	2G	3B	4B	5B
Fv	9	10	14	15	12	17	39	48
Fd	7	8	11	12	12	14	38	38
Fa	120	250	300	400	400	550	700	800

Force (N)	Series								
	00	0S	1S	2C	2S	3S	4S	5S	6S
Fv	9	14	15	12	17	20	40	60	70
Fd	7	9	10	12	11	14	25	40	55
Fa	120	140	250	400	350	500	650	750	900

Notes: the forces were measured on outer shell not fitted with contacts. The mechanical endurance represents the number of cycles after which the latching system is still effective (1 cycle = 1 latching/unlatching – 300 cycles per hour).

Mechanical endurance: 5000 cycles.

The values were measured according to the standard MIL-STD-1344A method 2013.1.

1N = 0.102kg.

● General Characteristics

Materials and Surface Treatment

Outer Shell

Brass

In most cases, LEMO connectors have a brass outer shell which is suitable for most general purpose applications, including civilian and military. The brass outer shells have a chrome nickel-plated surface which ensures very good protection against industrial atmosphere, salt air and most corrosive agents.

Alternative protective coatings are available to satisfy other specific environmental conditions: Electrolytic nickel; Nickel-gold; and Nickel-black chrome. After the black chrome treatment, the part is coated with a protective organic film.

Other metallic components

In general, most metallic components are manufactured in brass. However, bronze or beryllium copper are used where good elasticity is required (for example: grounding crown). Depending upon the application, these parts have electrolytic nickel or nickel-gold plating.

These parts can also be manufactured in stainless steel.

Sealing gasket

In general, sealing gaskets are made of silicone rubber MQ/MVQ. However, for vacuum-tight receptacles and couplers, gaskets are made of fluorosilicone rubber (FPM).

Sealing resin

An epoxy resin is used to seal both watertight and vacuum-tight receptacle and coupler models.

Electromagnetic compatibility (EMC) and shielding efficiency

The electromagnetic compatibility of a device can only be ensured by meeting a number of basic rules with the design of the device and by carefully selecting components, cables and connectors.

Electrical and electronic devices are to be designed to ensure the following:

- Reduce the emission of generated electromagnetic interference to a level where radios and telecommunication and other devices can properly function;
- Electromagnetic immunity against electromagnetic interference so that they can properly function.

When selecting a connector, screen or shielding efficiency and low resistance to electric continuity between the cable and the connector should be considered.

The design of LEMO connectors with metal shell and grounding crown guarantee optimum shielding efficiency in all applications where electromagnetic compatibility (EMC) is critical.

The performance of a connector is measured through shielding efficiency, a value that represents the ratio between the electromagnetic field on the outside and the inside of the shell. Our measurements are carried out according to the IEC 60169-1-3 standard.

The performance of B and S series connectors is comparable to the results of measurements carried out on a pair of FGG + PHG.1B connectors.

Insulator

Plastic material used by LEMO for manufacturing insulators is selected according to the electric and thermal properties required for the various connector types. Characteristics examined for the two connector types are:

- Dielectric strength;
- Comparative tracking index;
- Surface and volume resistivity;
- Continuous service temperature;
- Water absorption;
- Radiation resistance;
- Flammability rating;
- Resistance to hydrocarbon.

Mechanical and Electrical Properties

LEMO uses PEEK (Polyether Etherketone) for the insulator material. The performance of this thermo-plastic material is enhanced by the addition of glass fibers in the resin to achieve very high mechanical strength, to increase dielectric strength and to reduce water absorption rate. The above features of PEEK, plus its excellent chemical and radiation resistance, make it ideal for most applications. Sealing grommets are molded from Viton®. Such polymer has inherently excellent electrical insulating properties which does not change when exposed to adverse environments.

Insulating resistance $>10^{12}\Omega$ (per MIL-STD-1344A method 3003.1).

Radiation resistance

Note: Technical data in this chapter provide general information on plastics used by LEMO as electrical insulators. LEMO reserves the right to propose new materials with better technical characteristics, and to withdraw, without notice, any material mentioned in the present catalog or any other publications edited by LEMO S.A. and/or its subsidiaries. LEMO SA and its subsidiaries use only plastic granules, powder or bars supplied by specialized companies, and thus cannot in any case take responsibility with regard to this material.

Note: Values of insulation resistance between contacts are given on page 9.

Electrical Contact

Technical Description

The secure reliable electromechanical connection achieved with LEMO female cylindrical contacts is mainly due to two important design features:

1. *Prod proof entry* on the mating side which ensures perfect concentric mating even with carelessly handled connectors; and
2. *The pressure spring*, with good elasticity, maintains a constant even force on the male contact when mated. The leading edge of the pressure spring preserves the surface treatment (gold-plated) and prevents undue wear.

Contact Material and Treatment

LEMO female contacts are made of bronze beryllium (QQ-C-530) or bronze (UNS C 54400). These materials are chosen because of their high modulus of elasticity, their excellent electrical conductivity and a high mechanical strength.

Notes: The standard surface treatment are as follows:
Nickel: FS QQ-N-290A or MIL-C-26074C; and
Gold: ISO 4523.

1) Minimum value 2) For elbow printed circuit contacts

3) Treatment completed by 6 µm Sn-Pb tin-plating

LEMO male solder and printed circuit contacts are made of brass (UNS C 38500). Male crimp contacts are made of brass (UNS C 34500) or annealed brass (UNS C 38500) with optimum hardness (HV) for crimping onto the wire.

Type	Material (standard)	Surf. treatment (µm)		
		Cu	Ni	Au ¹⁾

Electrical Contact

Crimp Contacts

The square form crimp method is used (MIL-C-22520F, class I, type 2) photo 1 for single contact contacts.

For multicontact contacts the standard four-identer crimp method is used, MIL-C-22520F, class I, type 1), photo 2. The crimp method requires a controlled compression to obtain a symmetrical deformation of the conductor strand and of the contact material. The radial hole in the side of the contact makes it possible to check whether the conductor is correctly positioned within the contact. A good crimping is characterized by only slightly reduced conductor section and practically no gap.

For optimum crimping of bronze or brass contacts they are annealed to relieve internal stress and reduce material hardening during the crimping process.

Only the crimping zone is annealed with the help of an induction heating machine designed by the LEMO Research and Development Department (see photo 3).

- practical, quick contact fixing outside the insulator
- possible use at high temperature
- no risk of heating the insulator during the conductor-contact fixing
- high tensile strength

Crimp contacts are available in standard version (microphoto 1) for mounting maximum size conductors. For some dimensions, these crimp contacts can be produced with reduced crimp barrels (microphoto 2) for mounting reduced size conductors.

Contacts are provided in two forms: with a standard crimp barrel for large conductors (see fig. 1), or with a reduced crimp barrel for smaller conductors (see fig. 2).

A detailed range of conductor dimensions that can be crimped into our contacts is given on the table below.

Note: ¹⁾ For a given AWG, the diameter of some stranded conductor designs is larger than the solder cup diameter. Make sure that the maximum conductor diameter is smaller than $\varnothing C$.

Contact			Conductor stranded				F _r (N)
ø A (mm)	ø C (mm)	Form per fig.	AWG stranded		Section (mm ²)		
			min.	max.	min.	max.

4.0	4.00	1	12	10	4.000	6.00	90

Note: F_r = mean contact retention force in the insulator (according to IEC 60512-8 test 15a).

Printed Circuit Contacts

Printed circuit contacts are available in straight or elbow versions for certain connector types, mostly for straight and elbow receptacle models. Connection is made on flexible or rigid printed circuits by soldering.

Printed circuit contacts are gold-plated which guarantees optimum soldering, even after long-term storage. However for wave soldering, we recommend removal of the gold-plating from the contact end on the printed circuit side before soldering according to the assembly procedures.

straight

elbow

Electrical Contact

Test Voltage

Test voltage (Ue):
(measured according to the IEC 60512-2 test 4a standard).

It corresponds to 75% of the mean breakdown voltage. Test voltage is applied at 500 V/s and the test duration is one minute.

This test has been carried out with a mated plug and receptacle, with power supply only on the plug end.

Operating voltage (Us):
It is proposed according to the following ratio: $Us = \frac{Ue}{3}$

Caution:
For a number of applications, safety requirements for electrical appliances are more severe with regard to operating voltage.

In such cases operating voltage is defined according to creepage distance and air clearance) between live parts.

Please consult us for the choice of a connector by indicating the safety standard to be met by the product.

Voltage values are given in the table on insulator types for each series corresponding with values measured at sea level and are adapted to all applications up to an altitude of 2000 m.

In case a device is used at a higher altitude, air clearance between live parts has to be multiplied by the following coefficients:
(Test voltage also has to be divided by this coefficient).

altitude (m)	coefficient
2000	1.00
3000	1.14
4000	1.29
5000	1.48

Rated Current

(measured according to IEC 60512-3 test 5a).

The specified rated current can be applied simultaneously to all the contacts, corresponding with an average temperature rise of 104° F of the connector.

The current values are indicated in the table of insulator types in each series. For use at higher temperatures, acceptable rated current will be lower. It tends towards zero as the material is used at the maximum operating temperature accepted for the insulator.

In most cases, the current depends on the conductor dimension, or on the printed circuit dimension.

Caution:
In general, connectors should not be unmated while live.

For connectors with PEEK insulator, maximum admissible current will follow the curve below depending on the operating temperature T.

- **B Series Connectors**

● B Series Connectors

B series connectors have the following main features:

- security of the push-pull self-latching system
- multicontact types 2 to 64 contacts
- hybrid types (multicontact, high voltage, low voltage, coaxial)
- solder, crimp or printed circuit contacts (straight or elbow)
- keying system («G» key standard) for connector alignment
- multiple key options to avoid cross mating of similar connectors
- high packing density for space savings
- 360° screening for full EMC shielding.

Interconnections

Interconnections

Model Description

- CFF** Bridge plug with two non-latching plugs
- CRG** Bridge plug with two non-latching plugs, and monitoring receptacle and key (G) or keys (A...M)
- EBG** Fixed receptacle, nut fixing, round flange, key (G) or keys (A...L and R), screw fixing (back panel mounting)
- ECG** Fixed receptacle with two nuts, key (G) or keys (A...M and R) (back panel mounting)
- ECG** Fixed receptacle with two nuts, key (G) or keys (A...F and R) and straight contact for printed circuit (back panel mounting)
- ECG** Fixed receptacle with two nuts, key (G) or keys (A...F) with elbow (90°) contact for printed circuit (back panel mounting)
- EEG** Fixed receptacle, nut fixing, key (G) or keys (A...M and R) (back panel mounting)
- EFG** Fixed receptacle, nut fixing, key (G) or keys (A...M), with two flats on the shell and O-ring (back panel mounting)
- EGG** Fixed receptacle, nut fixing, key (G) or keys (A...M and R)
- EHG** Fixed receptacle, nut fixing, key (G) or keys (A...M and R), and protruding shell
- EJG** Fixed receptacle, press or adhesive fit, key (G) or keys (A...M)
- EKG** Fixed receptacle, nut fixing, key (G) or keys (A...L and R), special alignment mark on the front
- EMG** Fixed receptacle, nut fixing, microswitch, key (G) or keys (A...L)
- EMG** Fixed receptacle, with two nuts, microswitch, key (G) or keys (A...L)
- ENG** Fixed receptacle with grounding tab, nut fixing, with key (G) or keys (A...M)
- ENG** Fixed receptacle with grounding tab, nut fixing, key (G or J), PEEK outer shell
- ENY** Fixed receptacle with grounding tab, nut fixing, keys (Y), PSU or PPSU outer shell
- EPG** Elbow (90°) receptacle for printed circuit, key (G) or keys (A...F) (solder or screw fixing)
- ESG** Fixed receptacle with two round nuts, key (G) or keys (A...L), long threaded shell (back panel mounting)
- EXG** Elbow (90°) receptacle for printed circuit with two nuts, key (G) or keys (A...F) (solder or screw fixing)
- EYG** Fixed receptacle for printed circuit, nut fixing, key (G) or keys (A...F) (back panel mounting)
- EZG** Straight receptacle for printed circuit, key (G) or keys (A...F)
- FAG** Fixed plug, non-latching, nut fixing, key (G) or keys (A...M and R)
- FBG** Fixed plug, nut fixing, round flange, key (G) or keys (A...L and R), screw fixing
- FCG** Straight plug, key (G) or keys (A...L and R), cable collet and safety locking ring
- FDG** Straight plug, long version, key (G) or keys (A...L), cable collet
- FEG** Straight plug, key (G) or keys (A...L), cable collet, front seal and nut for fitting a bend relief
- FFG** Straight plug, non-latching, key (G) or keys (A...M), cable collet
- FGG** Straight plug, key (G) or keys (A...M and R), cable collet
- FGG** Straight plug, key (G) or keys (A...M), cable collet and nut for fitting a bend relief
- FGG** Straight plug, key (G or J), cable collet, PEEK outer shell
- FGY** Straight plug, keys (Y), cable collet and PSU or PPSU outer shell
- FGY** Straight plug, keys (Y), cable collet and PSU or PPSU outer shell and nut for fitting a bend relief
- FHG** Elbow (90°) plug, key (G) or keys (A...M and R), cable collet
- FIG** Straight plug for remote handling, key (G) or keys (A...L and R), special alignment mark, knurled handling surface, cable collet
- FKG** Elbow (90°) plug for remote handling, key (G) or keys (A...L), special alignment mark, knurled handling surface, cable collet
- FMG** Elbow (90°) plug, key (G) or keys (A...M), cable collet and lanyard release, long key
- FNG** Straight plug, key (G) or keys (A...M and R), cable collet and lanyard release
- FTG** Straight plug, key (G) and two parallel receptacles
- FYG** Straight plug, conical shell, key (G) or keys (A...M), cable collet
- FVB** Straight plug, keys (B), threaded-fixing for special cable crimping
- FVG** Straight plug, key (G) or keys (A, B), cable collet, threaded-fixing
- FWG** Fixed plug, nut fixing, key (G) or keys (A...L)
- FZG** Straight plug for remote handling, key (G) or keys (A...L and R), cable collet
- HCG** Fixed receptacle, nut fixing, key (G) or keys (A...M), watertight or vacuum-tight (back panel mounting)
- HEG** Fixed receptacle, nut fixing, key (G) or keys (A...M), or vacuum-tight (back panel mounting)
- HGG** Fixed receptacle, nut fixing, key (G) or keys (A...M and R), watertight or vacuum-tight
- HHG** Fixed receptacle, nut fixing, key (G) or keys (A...M), watertight or vacuum-tight
- HMG** Fixed receptacle with grounding tab, nut fixing, key (G) or keys (A...M), watertight or vacuum-tight (back panel mounting)
- HNG** Fixed receptacle, nut fixing, with grounding tab, key (G) or keys (A...M), watertight or vacuum-tight
- PEG** Fixed receptacle, nut fixing, key (G) or keys (A...L), cable collet (back panel mounting)
- PFG** Fixed receptacle, with two nuts, key (G) or keys (A...M and R), cable collet (back panel mounting)
- PHG** Free receptacle, key (G) or keys (A...M and R), cable collet
- PHG** Free receptacle, key (G) or keys (A...M), cable collet and nut for fitting a bend relief
- PKG** Fixed receptacle, nut fixing, key (G) or keys (A...M and R), cable collet
- PNG** Free receptacle, nut fixing, key (G) or keys (A...L and R), cable collet with lanyard release
- R••** Fixed coupler, nut fixing, key (G) or keys (A and J) at the flange end and keys (J, K or M) at the other end
- S••** Fixed coupler, nut fixing, key (G) or keys (A, B, J, K and L) at the flange end and key (G) or keys (A, B, J, K and L) at the other end, watertight or vacuum-tight
- XBG** Elbow (90°) receptacle fixing nut for printed circuit, key (G) or keys (A, B) (back panel mounting)
- XPF** Fixed receptacle, nut fixing, long shell, keys (F) for printed circuit (back panel mounting)
- XRБ** Elbow (90°) receptacle fixing nut for printed circuit, keys (B), short shell, threaded-fixing (back panel mounting)
- YHG** Fixed plug, nut fixing, non-latching, key (G) or keys (A...M)

Alignment Key and Polarized Keying System

B series connector model part numbers are composed of three letters. The LAST LETTER indicates the key position and the contact type (male or female). For example, straight plugs with «G» key or A, B, C, D, E, F, R or Y keys, are fitted with male contacts, whereas with J, K, L, M keys, plugs are fitted with female contacts.

Receptacles with «G» key or A, B, C, D, E, F, R or Y keys, are fitted with female contacts; whereas with J, K, L, M keys, receptacles are fitted with male contacts.

Note:
FTG, FGY, ENY models are not available with all the keys. Please consult pages corresponding to these models.
For R●● models see explanation on page 32 and for S●● models see explanation on page 40.

¹⁾ The first contact type mentioned is always the one at the flange end.

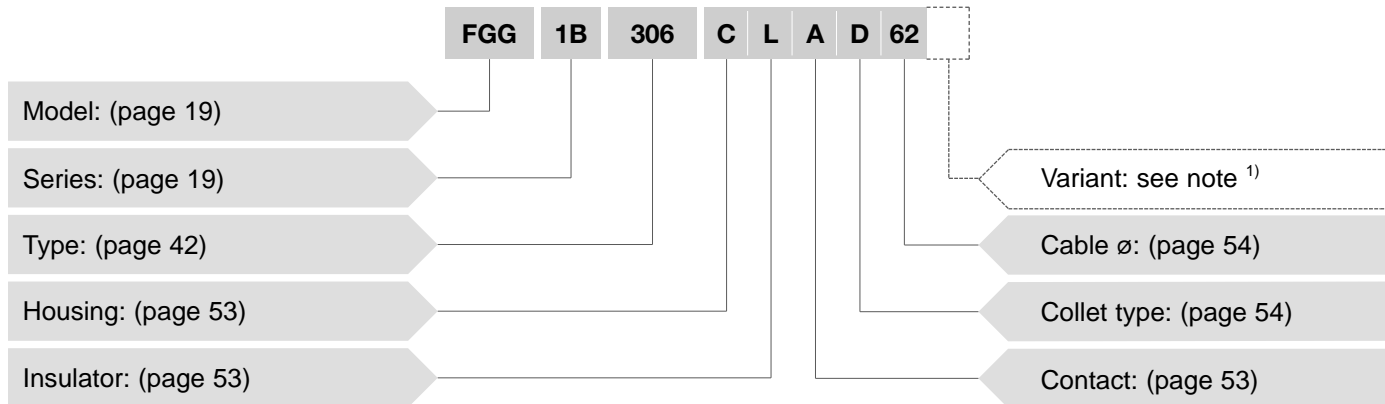

²⁾ Only FGY and ENY models are available.

■ First choice alternative □ Special order alternative

Data Subject to Change

● Part Number Example

Straight plug with cable collet

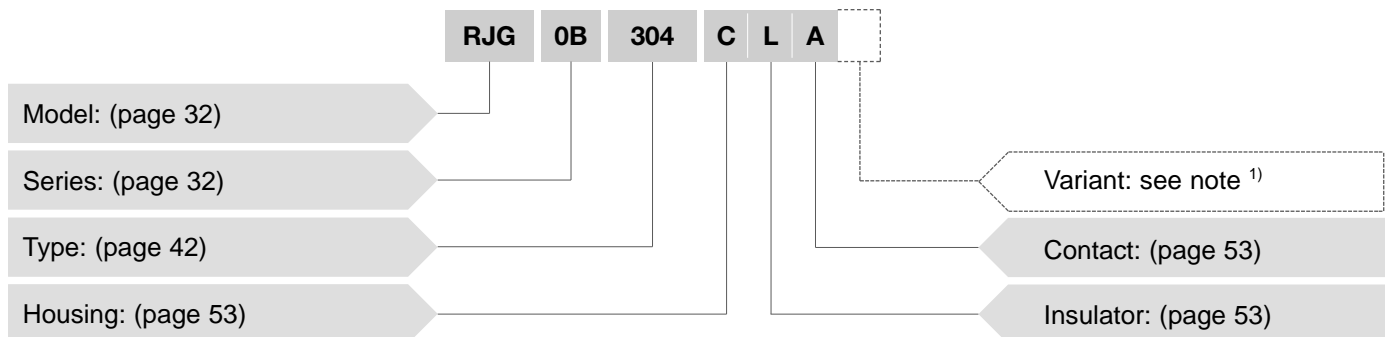

FGG.1B.306.CLAD62 = straight plug with key (G) and cable collet, 1B series, multicontact type with 6 contacts, outer shell in chrome-plated brass, PEEK insulator, male solder contacts, D type collet for 6.0 mm diameter cable.

Fixed receptacle

EGG.2B.319.KLM = fixed receptacle, nut fixing, with key (G), 2B series, multicontact type with 19 contacts, black chrome-plated brass outer shell, PEEK insulator, female crimp contacts.

Fixed coupler

RJG.0B.304.CLA = straight fixed coupler with keys (J) at the flange end and key (G) at the other end, 0B series, multicontact type with 4 contacts, chrome-plated brass outer shell, PEEK insulator, male-female contacts.

Note: ¹⁾ The «Variant» position in the reference is used to specify either the presence of a collet nut for fitting the bend relief, or the anodized color of the housing in aluminium alloy, or the color of the bridge plug housing.
For models with collet nut for fitting the bend relief, a «Z» should be indicated and a bend relief can be ordered separately as indicated in the «Accessories» section. An order for a connector with bend relief should thus include two part numbers.
For the various housings available in colors, the corresponding letter in the part number for the color is indicated on page 55.
For the watertight models of receptacle, the letter «P» is used; for the vacuum-tight models of receptacle the letters «PV» shall be indicated.

Technical Characteristics

Types

Elbow (90°) receptacles for printed circuit

These receptacle models are fixed onto the printed circuit either by soldering the four pins, or with four screws (M1.6) replacing the pins.

EXG receptacles are two nut fixing and are recommended in cases where a flexible printed circuit is used.

Materials and Treatment

Component	Material	Surface treat. (µm)		
		Cu	Ni	Au
Housing	PPS 1)	—		
	Brass	0.5	3	—
Metallic parts	Brass	0.5	3	—
Grounding crown	Bronze	0.5	3	—
Insulator	PEEK	—		
Female contact	Bronze	0.5	3	1.5

Note: 1) Not used for all sizes.

The surface treatment standards are as follows:
Nickel: FS QQ-N-290A; Gold: ISO 4523.

Note: ¹⁾ Only available with two contacts. ²⁾ Only available with three contacts.

For this fixed coupler, the first contact type mentioned is always the one at the flange end. On request, these couplers can be produced in other series, with other keys.

Panel cut-out: **P4**

Models with Microswitch

Some receptacles are available fitted with a microswitch. The microswitch is independent from the electrical contacts of the receptacle. The introduction of a plug into the receptacle activates the microswitch.

EMG Fixed receptacle, nut fixing, microswitch, key (G) or keys (A...L)

Reference		Dimensions (mm)								Availability
Model	Series	A	B	e	E	L	M	S1	S3	
EMG	0B	10	12.5	M9x0.6	5.5	35	1.2	8.2	11	○
EMG	1B	14	16.0	M12x1.0	7.0	38	1.5	10.5	14	○

Panel cut-out: **P1**

Note: Only available with 2 or 3 contacts (type 302, 303) in 0B series. Only available with 3 or 6 contacts (type 303, 306) in 1B series. For the microswitch: maximum operating voltage: 270 Veff/Vdc; rated current: 8.5A/0.5A.

EMG Fixed receptacle, with two nuts, microswitch, key (G) or keys (A...L)

Reference		Dimensions (mm)								Availability
Model	Series	A	B	e	E	L	M	S1	S3	
EMG	2B	20	19.5	M15x1.0	2.2	26.7	3.5	13.5	17	○

Panel cut-out: **P1**

Note: For the microswitch: maximum operating voltage: 250 Veff/Vdc; rated current: 7A/0.25A.

Bridge Plug

The LEMO audio-video connector system consists of two receptacles, with or without microswitch, a bridge plug with or without output monitoring and a plug with or without bend relief. This system is already widely used in telecommunication equipment and in radio and television broadcasting centers.

The connectors of this system are fully compatible with all other connector models of the same series and type. However, when designing systems, it should be considered that the distance between the assembled nut-fixing models should correspond to that between the outputs of the bridge plug. In order to provide the user with a coding system, the bridge plug housing, the double panel washers and the bend reliefs are available in nine colors.

Technical Characteristics

Mechanical and Climatic

Characteristics	Value	Standard
Endurance	> 1000 cycles	IEC 60512-5 test 9a
Working temperature	maximum 194° F

Note:

1) Receptacles are to be mounted with the keys mounted on the opposite side.

Plugs with parallel receptacles

These plug models have been designed to divide one or more signals originating from the same source to two different points. They are used in various fields of application, particularly in audio signal transmission.

FTG Straight plug, key (G) and two parallel receptacles

Note:

¹⁾ See calculation method, caution and suggested standard on page 11.

²⁾ Lowest measured value; contact to contact or contact to shell.

The surface treatment standards are as follows:

- Nickel: FS QQ-N-290A
- Chrome: FS QQ-C-320B
- Gold: ISO 4523

Plastic Housing Models

FGG, FGY, ENG and ENY plug and receptacle models are available with the outer shell and collet nut made with various insulating materials.

These connectors are particularly recommended for all applications requiring maximum electrical insulation when mated. The design, including a latch sleeve and a metal grounding crown, guarantees EMC screening efficiency to meet most requirements.

Technical Characteristics

Mechanical and Climatic

Characteristics	Value			Standard
	PEEK	PSU	PPSU	
Color	natural (beige)	white or grey	cream	—

Panel cut-out: **P1**

Note: ¹⁾ Maximum length with crimp contacts.

Note: Other models with plastic outer shell are available on request.

Watertight or Vacuum-Tight Models

YHG, HGG, HCG, HNG, HHG, HMG and S●● plug, receptacle or coupler models allow the device on which they are fitted to reach a protection index of IP68 as per IEC 60529. They are fully compatible with plugs of the same series and are widely used for portable radios, military, laboratory equipment, aviation, etc.

These models are identified by a letter «P» at the end of the reference.

Most of these models are also available in a vacuum-tight version. Such models are identified by an additional letter «V» at the end of the part number (certificate on request).

Epoxy resin is used to seal these models.

Part number example:

Watertight receptacle – HGG.1B.306.CLLP
Vacuum-tight receptacle – HGG.1B.306.CLLPV

Technical Characteristics

Mechanical and Climatic

Characteristics	Value	Standard
Endurance	> 5000 cycles	IEC 60512-5 test 9a
Humidity	up to 95% at 140° F	
Temperature range	-4° F/+176° F	
Salt spray corrosion test	> 144h	IEC 60512-6 test 11f
Protection index (mated)	IP 68	IEC 60529
Climatic category	20/80/21	IEC 60068-1
Leakage rate (He) ¹⁾	< 10 ⁻⁷ mbar.l.s ⁻¹	IEC 60512-7 test 14b
Maximum operating pressure ²⁾	00	60 bars
	0B	60 bars
	1B	60 bars
	2B	40 bars
	3B	30 bars
	4B	15 bars
	5B	5 bars

Note:

¹⁾ Only for vacuum-tight models.

²⁾ This value corresponds to the maximum allowed pressure difference for the assembled receptacle.

YHG Fixed plug, nut fixing, non-latching, key (G) or keys (A...M)

Reference		Dimensions (mm)								Availability
Model	Series	A	B	e	E	L	M	S1	S3	
YHG	0B	14.0	12.5	M9x0.6	2.9	24.1	14.6	8.2	11	○

Panel cut-out: **P4**

Panel cut-out: **P9** 1B series

Note: For this fixed coupler, the first contact type mentioned is always the one at the flange end. On request these couplers can be produced in other series, with other keys. The 5B series is delivered with a round nut.

Threaded-Fixing Models

The 00 multicontact series includes two threaded-fixing plug models. These plugs can be mated with receptacles with a threaded front end (XRB or ESG). Plugs include an O-ring, guaranteeing an IP64 protection index when mated.

FVG Straight plug, key (G) or keys (A, B), cable collet, threaded-fixing

Reference		Dimensions (mm)					Avail-ability
Model	Series	A	L	M	S1	S2	
FVG	00	9	28.5	24	5	5	○

Note: To be ordered with nut for fitting a bend relief to obtain the rating IP 64.

FVB Straight plug, keys (B), threaded-fixing for special cable crimping

Reference		Dimensions (mm)			Avail-ability
Model	Series	A	L	M	
FVB	00	9	20	15.4	○

Note: After assembly the special bend relief GMF.00.018.D● (to be ordered separately) is to be fitted.

XRB Elbow (90°) receptacle fixing nut for printed circuit, keys (B), short shell, threaded-fixing (back panel mounting)

Reference		Dimensions (mm)							Avail-ability
Model	Series	A	e	E	I	L	M	P	
XRB	00	10	M7x0.5	1.8	7	14	2.5	7	○

Panel cut-out: **P2** PCB drilling pattern: **P18** for contact only

Note: 1) Minimum length of free thread to ensure mating.

ESG Fixed receptacle with two round nuts, key (G), or keys (A, B), long threaded shell (back panel mounting)

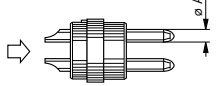

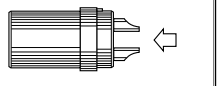

Reference		Dimensions (mm)							Avail-ability
Model	Series	A	B	e	E	L	M	N	
ESG	00	9.5	9	M7x0.5	4.2	15.5	2	13.7	○

Panel cut-out: **P2**

Note: 1) Minimum length of free thread to ensure mating.

Technical Information

Coaxial, Type A0, A, A1 and type A3

The coaxial of this type is permanently fixed into the insert. The conductor is soldered and the shield is clamped.

Component	Material	Surface Treatment		
		Cu	Ni	Au
1 Male Sleeve	Brass (UNS C 38500)	0.5	3	1.5
2 Insert	PTFE (UNS D 1457-83)	-	-	-

X	Avional ⁸⁾	nickel	nickel-plated brass	□

Note: detailed characteristics of these materials and treatments are presented on page 5.

¹⁾ The other metallic parts are in stainless steel.

²⁾ The «variant» position of the reference is used to specify the anodized color.

³⁾ Only available for elbow (90°) receptacles for printed circuit of the B and S series.

⁴⁾ Only available for FGG and ENG models of the B series.

⁵⁾ Only for CFF and CRG bridge plugs.

⁶⁾ Only available for ENY and FGY models of the B series. For the color, see the «variant» position.

⁷⁾ Only available for ENY and FGY models of the B series.

⁸⁾ Anthracite color.

■ First choice alternative □ Special order alternative

● Insulators

Ref.	Material	Note
L	PEEK	1)
Y	PEEK	2)

Note: Detailed characteristics of these materials are presented on page 7.

¹⁾ For solder or printed circuit contacts.

²⁾ Only for crimp contacts. For the type 3B.309; 4B.304; 4B.307; 4B.320; 5B.304 and 5B.350, the reference shall be «L» instead of «Y».

● Contacts

Contacts for plugs, free or fixed receptacles

5B	D	11 to 15	FFM.5B.130.LC	GMA.4B.●●●●●

Note: ¹⁾ The bend relief is to be ordered separately (see pages 137).

All dimensions are in millimeters.

● Variant

Color of the bridge plug shells and connectors shell made of plastic material

The «variant» position of the reference is used to specify the color of the shell according to the table below.

Ref.	Color	Ref.	Color	Ref.	Color
A	blue	J	yellow	S	orange
B ¹⁾	white	M	brown	V	green
F ²⁾	cream	N	black		
G ¹⁾	grey	R	red		

Note:

¹⁾ PSU connector shells are only available in white or grey colors.

²⁾ PPSU connector shells are only available in cream colors.

The variant position is also used to indicate epoxy filling of watertight and vacuum-tight receptacle models, the reference P is used.

Anodized color for Aluminum

The «variant» position of the reference is used to specify the anodized color according to the table below.

Part number for connector with standard collet nut

Ref.	Anodized color	Ref.	Anodized color
A	blue	R	red
J	yellow	T	natural
N	black	V	green

Part number for connector with collet nut for bend relief

Ref.	Anodized color
L	black
X	natural

Note: Other anodizing colors are available for connectors with collet nut for bend relief. Please consult us.

● Standard, typically 0-6 weeks delivery for quantities of 250 or less.

○ Non-standard product, contact LEMO USA, typically 6-12 weeks delivery for quantities of 250 or less.

Non-standard product is defined as any product which contains one or more components which are not standard.

Data Subject to Change

- **S Series Connectors**

● S Series Connectors

S series connectors have the following main features:

- security of the push-pull self-latching system
- single contact types transmitting current up to 230 A and multicontact types with up to 106 contacts
- hybrid types (multicontact, high voltage, low voltage, coaxial)
- solder or printed circuit contacts (straight or elbow)
- polarization by stepped insert (half-moon) fitted with male and female contacts
- 360° screening for full EMC shielding
- wide range of models satisfying most applications.

Interconnections

Model Description

EBC Fixed receptacle with square flange, protruding shell and screw fixing	ERZ Fixed receptacle, nut fixing with double microswitch and printed circuit contacts	FTA T-plug with two in line receptacles
EBD Fixed receptacle with square flange and screw fixing	EWB Fixed receptacle, nut fixing, with two flats on the flange, watertight or vacuum-tight	FZP Straight plug for remote handling, cable collet and inner anti-rotating device
EBS Fixed receptacle with round flange and screw fixing	EXP Elbow (90°) receptacle for printed circuit with two nuts (back panel mounting)	HCP Fixed receptacle, nut fixing, watertight or vacuum-tight (back panel mounting)
ECP Fixed receptacle with two nuts, long threaded shell (back panel mounting)	FAA Fixed plug non-latching, nut fixing	HGP Fixed receptacle, nut fixing, watertight or vacuum-tight
ECP Fixed receptacle with two nuts, long threaded shell, with straight contact for printed circuit (back panel mounting)	FEF Straight coupler with two plugs and front seal	HGW Fixed receptacle, nut fixing, with back washer, watertight or vacuum-tight
ECP Fixed receptacle with two nuts, long threaded shell, with elbow (90°) contacts for printed circuit (back panel mounting)	FFA Straight plug, cable collet	PCA Free receptacle, cable collet
EEP Fixed receptacle, nut fixing (back panel mounting)	FFA Straight plug with oversize cable collet	PCA Free receptacle, with oversize cable collet
EHP Fixed receptacle, nut fixing, protruding shell	FFA Straight plug, cable collet and nut for fitting a bend relief	PCA Free receptacle, cable collet and nut for fitting a bend relief
EMD Fixed receptacle with two nuts and microswitch (back panel mounting)	FFA Straight plug, cable collet, PEEK or POM outer shell	PCP Free receptacle, cable collet and inner anti-rotating device
EPL Elbow (90°) receptacle for printed circuit	FFB Straight plug, cable collet and safety locking ring	PCP Free receptacle, cable collet and inner anti-rotating device and nut for fitting a bend relief
ERA Fixed receptacle, nut fixing	FFE Straight plug, cable collet, front seal and nut for fitting a bend relief	PSA Fixed receptacle, nut fixing, cable collet
ERC Fixed receptacle, nut fixing with slot in the flange	FFF Straight plug, non-latching, cable collet	PSP Fixed receptacle, nut fixing, cable collet and inner anti-rotating device
ERD Fixed receptacle with two nuts (back panel mounting)	FFL Straight plug, flats on latch sleeve, cable collet and inner anti-rotating device	PSS Free receptacle, nut fixing for cable crimping
ERM Fixed receptacle, nut fixing with microswitch	FFL Straight plug, cable collet, with PSU and PPSU outer shell, inner anti-rotating device and nut for fitting a bend relief	PZP Free receptacle for remote handling, cable collet and inner anti-rotating device
ERN Fixed receptacle, nut fixing, with grounding tab	FFP Straight plug, cable collet and inner anti-rotating device	RAD Fixed coupler, nut fixing
ERN Fixed receptacle, nut fixing, with grounding tab, PEEK or POM outer shell	FFP Straight plug, cable collet and inner anti-rotating device and nut for fitting a bend relief	RMA Free coupler
ERS Fixed receptacle, nut fixing, long threaded shell, without flats	FFP Straight plug, cable collet, PEEK or POM outer shell and inner anti-rotating device	SWH Fixed coupler, nut fixing, watertight or vacuum-tight
ERT Fixed receptacle, force fit, with grounding tab	FFP Straight plug, cable collet, PEEK or POM outer shell, inner anti-rotating device and nut for fitting a bend relief	
ERY Fixed receptacle, protruding shell, screw fixing on the panel (back panel mounting)	FFS Straight plug for cable crimping	
	FLA Elbow (90°) plug, cable collet	
	FLS Elbow (90°) plug for cable crimping	

Part Section Showing Internal Components

Technical Characteristics

Mechanical and Climatic

Characteristics	Value	Standard
Endurance	> 5000 cycles	IEC 60512-5 test 9a
Humidity	up to 95% at 140° F	
Temperature range ¹⁾	-67° F, +482° F	
Resistance to vibrations	10-2000 Hz, 15 g	IEC 60512-4 test 6d
Shock resistance	100 g, 6 ms	IEC 60512-4 test 6c
Salt spray corrosion test	> 144h	IEC 60512-6 test 11f
Protection index (mated)	IP 50	IEC 60529
Climatic category ¹⁾	55/175/21	IEC 60068-1

Electrical

Characteristics	Value	Standard
Shielding efficiency	at 10 MHz	> 75 dB
	at 1 GHz	> 40 dB

Note:

The various tests have been carried out with FFA and ERA connector pairs, with chrome-plated brass shell and PEEK insulator. Detailed electrical characteristics, as well as materials and treatment are presented on page 5.

¹⁾ For watertight or vacuum-tight models: see page 76.

Note:

- 1) With elbow (90°) printed circuit contact.
 - 2) With PEEK or POM outer shell.
 - 3) With oversize collet.
 - 4) With nut for fitting a bend relief.
 - 5) With PSU outer shell.
 - 6) With PEEK or POM outer shell.
- = available models by series and types

Data Subject to Change

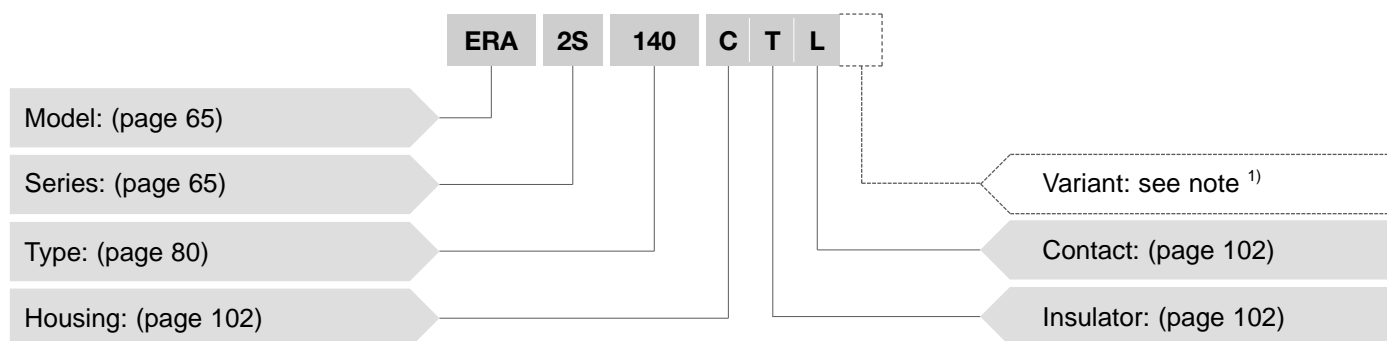

• Part Number Example

Straight plug with cable collet

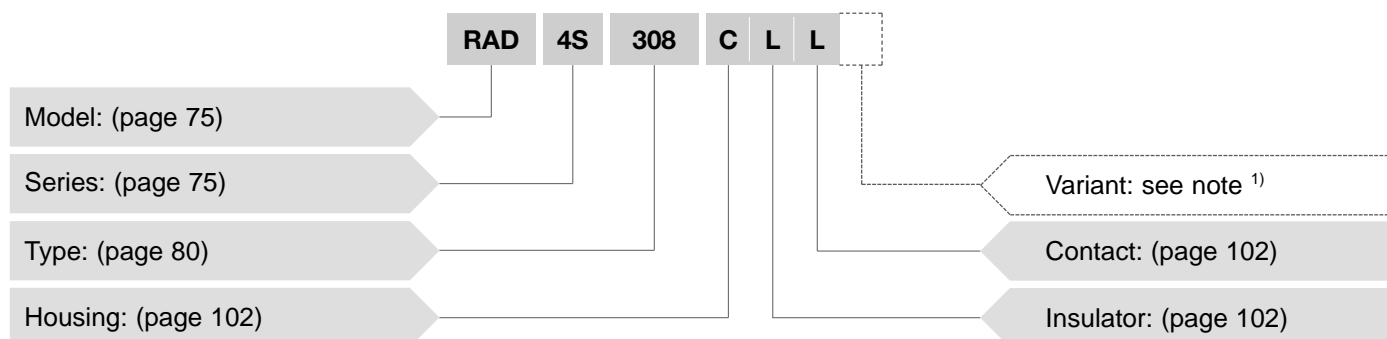

FFA.0S.303.CLAC32 = straight plug with cable collet, 0S series, multicontact type with three contacts, outer shell in chrome-plated brass, PEEK insulator, two male and one female solder contacts, C type collet for a 3.2 mm diameter cable.

Fixed receptacle

ERA.2S.140.CTL = fixed receptacle, nut fixing, 2S series, single contact type ø 4.0 mm contacts, chrome-plated brass outer shell, PTFE insulator, female solder contact.

Fixed coupler

RAD.4S.308.CLL = straight coupler, nut fixing, 4S series, multicontact type with eight contacts, chrome-plated brass outer shell, PEEK insulator, four female and four male contacts each end.

Note: ¹⁾ The «Variant» position of the part number is used to specify either the presence of a nut for fitting a bend relief, or the anodized color of the aluminium housings or the color of housings using plastic material.
 For models with collet nut for fitting a bend relief, a «Z» should be indicated and a bend relief can be ordered separately as indicated in the «Accessories» section. An order for a connector with bend relief should thus include two part numbers.
 For the various housings available in colors, the corresponding letter in the part number for the color is indicated on page 110.
 For the watertight models of receptacle, the letter «P» is used; for the vacuum-tight models of receptacle the letters «PV» shall be indicated.

• Models

FFA Straight plug, cable collet

Reference		Dimensions (mm)				Availability
Model	Series	A	L	M	S2	
FFA	00	6.4	26.0	18.0	4.5	●
FFA	0S	9.0	34.5	24.5	6.5	●
FFA	1S	12.0	42.5	31.5	8.5	●
FFA	2S	14.8	52.0	40.0	11.0	●
FFA	3S	17.8	61.0	46.0	14.0	●
FFA	4S	24.8	77.0	59.0	19.0	○
FFA	5S	35.1	103.0	78.0	29.0	○
FFA	6S	46.0	106.0	81.0	38.0	○

FFA Straight plug with oversize cable collet

Reference		Dimensions (mm)						Availability
Model	Series	A	B	L	M	S1	S2	
FFA	00	6.4	8.0	34.0	26.0	7.0	6.5	○
FFA	0S	9.0	10.0	45.5	35.5	9.0	8.5	○
FFA	1S	12.0	13.0	57.0	46.0	12.0	11.0	○
FFA	2S	14.8	18.0	67.0	55.0	14.0	14.0	○
FFA	3S	17.8	21.0	85.0	70.0	19.0	19.0	○

Panel cut-out: **P1**

PCB drilling pattern: **P24**

Note: This contact type is available for all back panel mounting receptacle types.
See page 156 for available types.
Length «L» depends on the number of contacts, see PCB drilling pattern on page 156.
The 3S series is delivered with a conical nut.

Elbow (90°) receptacles for printed circuit

These receptacle models are fixed onto the printed circuit either by soldering the corner pins or with four screws (M1.6) replacing the pins.

EXP receptacles are two nut fixing and are recommended in cases where a flexible printed circuit is used.

Technical Characteristics

Models with microswitch

Some receptacles are available fitted with a microswitch. The microswitch is independent from the electrical contacts of the receptacle. The introduction of the plug into the receptacle activates the microswitch (the drawings below are of corresponds to the receptacles without the plug).

EMD Fixed receptacle with two nuts and microswitch (back panel mounting)

Reference		Dimensions (mm)								Availability
Model	Series	A	B	e	E	L	M	S1	S3	
EMD	2S	20	19.5	M15x1.0	2.2	26.7	3.5	13.5	17	○

Panel cut-out: **P1**

Note: Only exists in 10-contact version (type 310).
For the microswitch: maximum operating voltage: 250Veff/Vdc rated current: 7A/0.25A.

ERM Fixed receptacle, nut fixing with microswitch

Reference		Dimensions (mm)								Availability
Model	Series	A	B	e	E	L	M	S1	S3	
ERM	1S	14	16	M12x1.0	7.5	38	1.5	10.5	14	○

Panel cut-out: **P1**

Note: Only exists in 2 or 5-contact versions (type 302, 305).
For the microswitch: maximum operating voltage: 270Veff/Vdc rated current: 8.5A/0.5A.

ERZ Fixed receptacle, nut fixing with double microswitch and printed circuit contacts

Reference		Dimensions (mm)											Availability
Model	Series	A	B	C	e	E	L	M	N	O	S1	S3	
ERZ	1S	14	16	0.4	M12x1.0	7.5	39	1.5	2.7	0.9	10.5	14	○

Panel cut-out: **P1**

Note: Only exists in 3 or 6-contact versions (type 303, 306).
For the microswitch: maximum operating voltage: 28 Veff rated current: 0.1 A.

Note: Multicontact version available only with 2 contacts (type 302).

Plastic Housing Models

FFA, FFP, FFL and ERN plug and receptacle models are also available with the outer shell and the collet nut made from various insulating materials. These connectors are particularly recommended for all applications requiring maximum electrical insulation when mated, such as medical applications. The design, including a latch sleeve and a metal grounding crown, guarantees EMC screening efficiency to meet most requirements.

Panel cut-out: **P1**

Note: ¹⁾ Single contact model.

Watertight or vacuum-tight models

HGP, HGW, EWB, HCP, SWH receptacle or coupler models allow the device on which they are fitted to reach a protection index of IP68 as per IEC 60529. They are fully compatible with plugs of the same series and are widely used for portable radios, military, laboratory equipment, aviation, etc. These models are identified by a letter «P» at the end of the reference.

Most of these models are also available in a vacuum-tight version. Such models are identified by an additional letter «V» at the end of the part number (certificate on request).

Epoxy resin is used to seal these models.

Part number example:

Watertight receptacle – HGP.1S.304.CLLP

Vacuum-tight receptacle – HGP.1S.304.CLLPV

Mechanical and Climatic

Characteristics	Value	Standard
Endurance	> 5000 cycles	IEC 60512-5 test 9a
Humidity	up to 95% at 140° F	
Temperature range	- 4° F/+176° F	
Salt spray corrosion test	> 144h	IEC 60512-6 test 11f
Protection index (mated)	IP 68	IEC 60529
Climatic category	20/80/21	IEC 60068-1
Leakage rate (He) ¹⁾	< 10 ⁻⁷ mbar.l.s ⁻¹	IEC 60512-7 test 14b
Maximum operating pressure ²⁾	0S	60 bars
	1S	60 bars
	2S	40 bars
	3S	30 bars
	4S	15 bars
	5S	5 bars
	6S	5 bars

Note:

¹⁾ Only for vacuum-tight models.

²⁾ This value corresponds to the maximum allowed pressure difference for the assembled receptacle.

HGP Fixed receptacle, nut fixing, watertight or vacuum-tight

Reference		Dimensions (mm)									Availability
Model	Series	A	B	e	E	L	L ¹⁾	M	S1	S3	
HGP	0S	18	16.0	M12x1.0	11.5	20.5	21.5	4.0	10.5	14	○

● Technical Information

Example of high voltage contact construction for mixed high voltage and multi high voltage connectors

The high voltage contact is permanently fixed into the inserts. The conductor is secured by solder.

Component	Material	Surface Treatment		
		Cu	Ni	Au
1 Insert	PTFE (ASTM D 1457-83)			
2 Male Contact	Brass (UNS C 385)	0.5	3	1.5
3 Insert	PTFE (ASTM D 1457-83)			
4 Female Contact	Bronze (UNS C 544)	0.5	3	2.5
5 Insert Tube	PTFE (ASTM D 1457-83)			
6 Clips	Brass (UNS C 385)	0.5	3	

Example of coaxial contact construction for mixed coax and multi coax connectors

Coaxial type A0, A, A1 and type A3

The coaxial of this type is permanently fixed into the insert. The conductor is secured by solder and the shield by crimping.

The coax contact is permanently fixed into the inserts. The conductor is secured by solder and the shield by crimping.

Component	Material	Surface Treatment		
		Cu	Ni	Au
1 Male Sleeve	Brass (UNS C 385)	0.5	3	1.5
2 Insert	PTFE (UNS D 1457-83)			
3 Male Contact	Brass (UNS C 385)	0.5	3	1.5
4 Female Sleeve	Bronze (UNS C 544)	0.5	3	2.0
5 Insert	PTFE (UNS D 1457-83)			
6 Female Contact	Bronze (UNS C 544)	0.5	3	2.5
7 Insulating Sleeve	PTFE (UNS D 1457-83)			
8 Grounding Sleeve	Brass (UNS C 385)	0.5	3	
9 Collet	Brass (UNS C 187)	0.5	3	
10 Ferrule	Brass (UNS C 385)	0.5	3	

Technical characteristics of coax contacts

The coaxial part is permanently fixed in the main insert. The inner conductor of the cable is soldered to the contact while the outer conductor is clamped by the collet.

Characteristics	Unit	Coax Type A	Coax Type A0	Coax Type A1	Coax Type A3

¹⁾ The cable group number corresponding to the chosen cable must be written in the variant position of the part number.

Contact configuration for RMA, RAD and SWH fixed couplers

Use of plugs for mating with RAD, RMA and SWH couplers

Single contact type:

- Reference M For coupling two identical plugs fitted with male contact (contact reference A).
 Reference L For coupling a plug fitted with male contacts (contact reference A) at the flange end for RAD and SWH and an inverted plug fitted with female contacts (contact reference L) at the other end.
 Reference A For the inverted version of code L.

Multicontact type:

- Reference L For coupling a standard plug (contact reference A) at the flange end for RAD and SWH and an inverted plug (contact reference as indicated in the above table) at the other end.
 Reference M For coupling two standard plugs (contact type A).
 Only available for RAD and RMA models.

Note: ¹⁾ This connector combination does not allow for contact numbering. One of the plugs has to be cable mounted in a way to ensure correct signal continuity.

●Housings

Ref.	Material	Surface treatment		Note
		Outer shell and collet nut	Latch sleeve and grounding crown	
C	Brass ¹⁾	chrome	nickel	■
D	Brass	gold-plated	nickel	□
N	Brass	nickel	nickel	□
K	Brass	black chrome	nickel	□
S	Stainless steel	without treatment	nickel-plated brass	□
T	Stainless steel	without treatment	stainless steel	□
U	Stainless steel ²⁾	without treatment	stainless steel	□
L	Aluminium alloy ³⁾	anodized	nickel-plated brass	□
B	POM black ⁴⁾	without treatment	nickel-plated brass	□
H	PPS/brass ⁵⁾	without treat./nickel	nickel	□
G	PEEK ⁴⁾	without treatment	nickel-plated brass	□
P	PSU ⁶⁾	without treatment	nickel-plated brass	□
R	PPSU ⁷⁾	without treatment	nickel-plated brass	□

Note:

- 1) In the E series the latch sleeve is chrome-plated.
- 2) The other metallic components are in stainless steel.
- 3) The «variant» position of the reference is used to specify the anodized color.
- 4) Only available for FFP, ERN and PCP models of the S series.
- 5) For S series EPL and EXP elbow (90°) receptacles for printed circuit.
- 6) Available only for the FFL model of the S series. See colors in «variant» position.
- 7) Available only for the FFL model of the S series. Detailed characteristics of these materials are presented on page 5.

■ First choice alternative □ Special order alternative

●Insulators

Ref.	Material or form	Note
L	PEEK	■
T	PTFE ¹⁾	■
T	FEP ²⁾	□

Ref.	Material or form	Note
V	PI ²⁾	□
N	PA6.6 ³⁾	■

Note:

- 1) Only for single contact types.
- 2) Only for multicontact types.
- 3) Material for 5S and 6S series multicontact inserts. Detailed characteristics of these materials are presented on page 7.

■ First choice alternative □ Special order alternative

●Contacts

Contacts for plugs, free or fixed receptacles

Ref.	Contact type
A	Male solder
C	Male crimp ^{1) 4)}
L	Female solder
M	Female crimp ^{2) 4)}
N	Female printed circuit (straight)
V	Female printed circuit (elbow)

Multicontact connectors are fitted with hermaphroditic inserts including male and female contacts. However, by convention, the letter indicating the contact type in the part number composition will be the male contact (reference A) for plugs and female contact (reference L) for receptacles.

In case of an odd number of contacts, the letter of reference corresponds to the one with the larger number of contacts. For example, a 309 type connector with contact (reference A) will include 5 male and 4 female contacts.

Contacts for couplers and plug with receptacle

Ref.	Contact type	single contact	multicontact
A	Male - Female	□	—
L	Female - Male	□	■
M	Female - Female	■	□
F	Female - Female - Male ³⁾	■	■

For RAD and SWH fixed couplers, the first contact type mentioned is always the one at the flange end. Contact configuration and receptacles to be used for a connection are explained on the following page.

Note:

- 1) For the FFS model of the 00 series and FFA or FFL models of the S series.
- 2) For the PSS model of the 00 series and PCA or PSA models of the S series.
- 3) For the FTA model of the S series.
- 4) For conductor range that can fit with crimp contacts consult page 10.

Connectors can be configured « inverted » i.e. plugs equipped with female contacts (reference L), receptacles with male contacts (reference A). This solution is particularly useful when plugs are mated to a coupler and it is essential to respect contact alignment (see previous page).

● Collets

Note:

- ¹⁾ For ordering collets separately.
 - ²⁾ These collets can only be used with the FLA model.
 - ³⁾ For ordering a K type collet separately, the oversize collet and the corresponding collet nut should also be ordered.
 - ⁴⁾ These collets should be used with FLA, FFP and PCP models.
 - ⁵⁾ For models with bend relief, the FFM.●.130.LC collet nut should be ordered (see page 110).
 - ⁶⁾ These collets cannot be used for connector models with collet nut for fitting a bend relief.
- All dimensions are in millimeters.

Note:

¹⁾ For ordering collets separately.

³⁾ For ordering a K type collet separately, the oversize collet and the corresponding collet nut should also be ordered.

⁴⁾ These collets should be used with FLA, FFP and PCP models.

⁵⁾ For models with bend relief, the FFM.●●.130.LC collet nut should be ordered (see page 110).

All dimensions are in millimeters.

Note: The L type collet is the only possible for the 5S.112 type.

Data Subject to Change

● Standard, typically 0-6 weeks delivery for quantities of 250 or less.

○ Non-standard product, contact LEMO USA, typically 6-12 weeks delivery for quantities of 250 or less.

Non-standard product is defined as any product which contains one or more components which are not standard.

Variant

Anodized color

The «variant» position of the reference is used to specify the anodized color according to the table below.

Part number for connector with standard collet nut

Ref.	Anodized color	Ref.	Anodized color
A	blue	R	red
J	yellow	T	natural
N	black	V	green

Part number for connector with bend relief backnut

Ref.	Anodized color
L	black
X	natural

Note: Other anodizing colors are available for connectors with bend relief backnut. Please consult us.

- **2C Series Connectors**

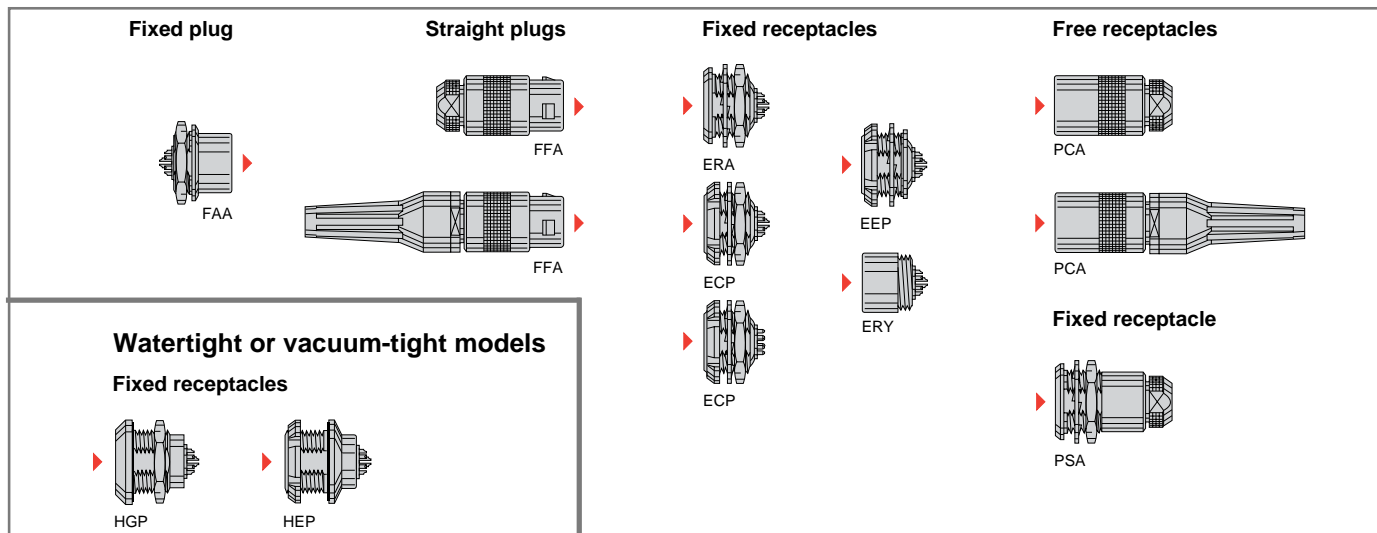

● 2C Series Connectors

In many applications, it is necessary to use multicontact connectors which have shortened dimensions but require high contact density. LEMO short series connectors, which are shorter than 30 mm, perfectly meet these needs.

The 2C series, featuring a hermaphroditic insert, is available in multicontact type up to 14 contacts.

Interconnections

Model Description

ECP Fixed receptacle with two nuts (back panel mounting)

ECP Fixed receptacle with two nuts, straight contact for printed circuit (back panel mounting)

EEP Fixed receptacle, nut fixing (back panel mounting)

ERA Fixed receptacle, nut fixing

ERY Fixed receptacle, protruding shell (screw fixing on the panel)

FAA Fixed plug, nut fixing, non-latching

FFA Straight plug, cable collet

FFA Straight plug, cable collet and nut for fitting a bend relief

HEP Fixed receptacle, nut fixing, watertight or vacuum-tight (back panel mounting)

HGP Fixed receptacle, nut fixing, watertight or vacuum-tight

PCA Free receptacle, cable collet

PCA Free receptacle, cable collet and nut for fitting a bend relief

PSA Fixed receptacle nut fixing, cable collet

Part Section Showing Internal Components

Technical Characteristics

Mechanical and Climatic

Characteristics	Value	Standard
Endurance	> 500 cycles	IEC 60512-5 test 9a
Humidity	up to 95% at 140° F	
Temperature range ¹⁾	-67° F +482° F	
Salt spray corrosion test	> 144 h	IEC 60512-6 test 11f
Protection index	IP50	IEC 60529
Climatic category	55/175/21	IEC 60068-1

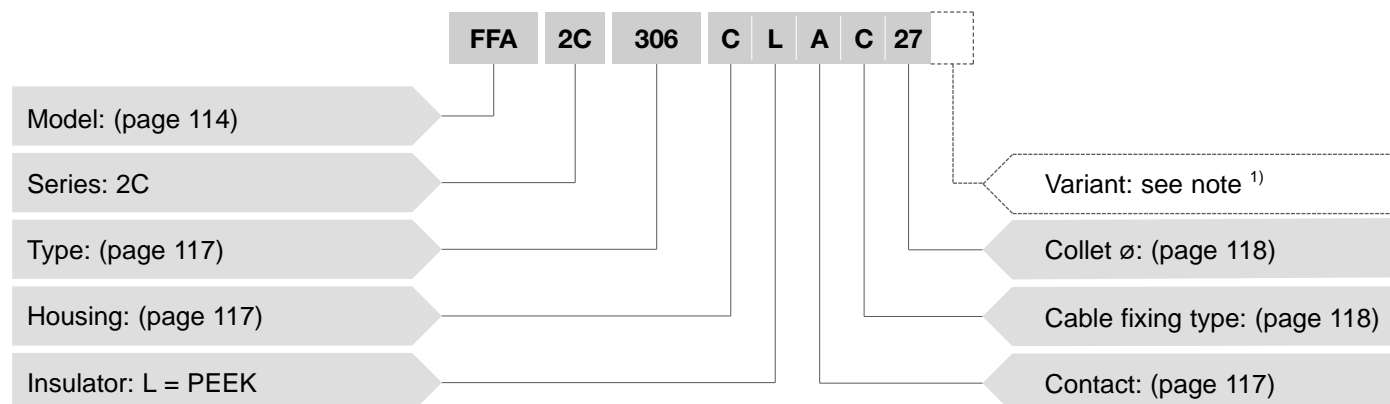

Note:

Various tests have been carried out with FFA and ERA connector pairs, with chrome-plated brass shell and PEEK insulator. Detailed electrical characteristics, as well as materials and treatment are presented in the chapter Technical Characteristics on page 5.

¹⁾ For watertight or vacuum-tight models: -4° F, +176° F

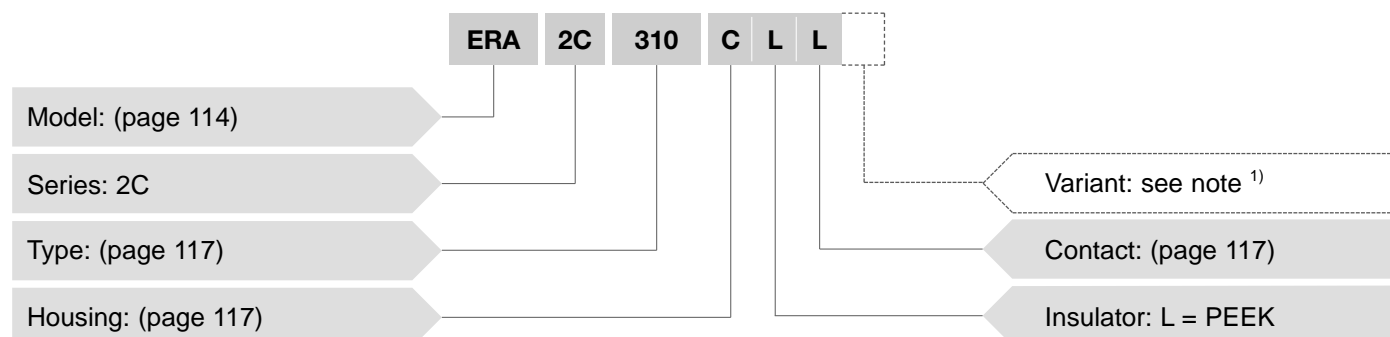

● Part Number Example

Straight plug with cable collet

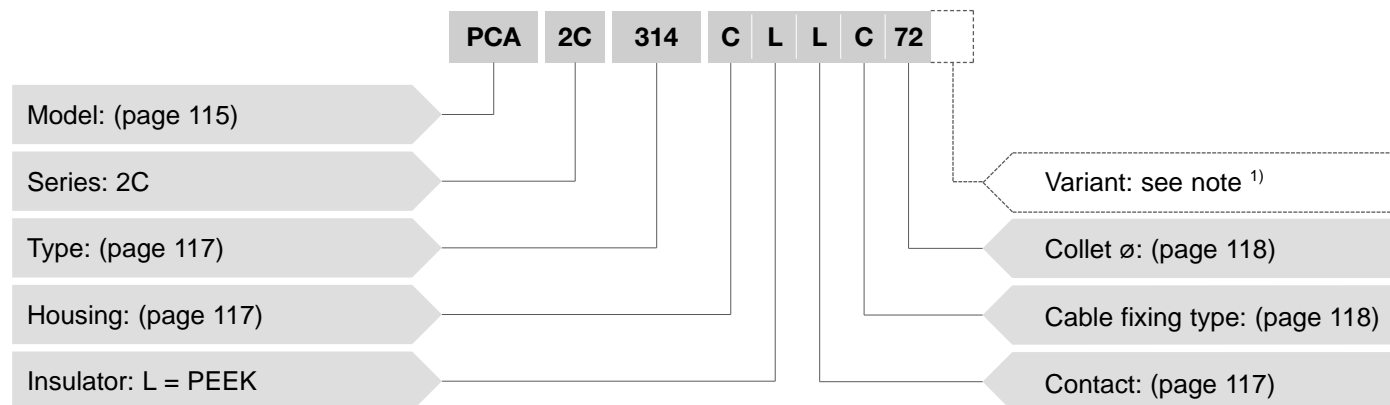

FFA.2C.306.CLAC27 = straight plug with cable collet, 2C series, multicontact type with six contacts, outer shell in chrome-plated brass, PEEK insulator, male solder contacts, C type collet for 2.7 mm diameter cable.

Fixed receptacle

ERA.2C.310.CLL = fixed receptacle, nut fixing, 2C series, multicontact type with 10 contacts, outer shell in chrome-plated brass, PEEK insulator, female solder contacts.

Free receptacle

PCA.2C.314.CLLC72 = straight receptacle with cable collet, 2C series, multicontact type with 14 contacts, outer shell in chrome-plated brass, PEEK insulator, female contacts solder, C type collet for 7.2 mm diameter cable.

Note: 1) The «Variant» position in the reference is used to specify either the presence of a collet nut for fitting the bend relief or the anodized color of the housing in aluminium alloy. See page 118.

For models with collet nut for fitting the bend relief, a «Z» should be indicated and a bend relief can be ordered separately as indicated in the «Accessories» section. An order for a connector with bend relief should thus include two part numbers.

For the various housings available in colors, the corresponding letter in the part number for the color is indicated on page 118.

For the watertight models of receptacle, the letter «P» is used; for the vacuum-tight models of receptacle the letters «PV» shall be indicated.

● Models

FFA.2C Straight plug, cable collet

Availability: ○

FFA.2C Straight plug, cable collet and nut for fitting a bend relief

Availability: ○

Note: The bend relief must be ordered separately (see page 137).

FAA.2C Fixed plug, nut fixing, non-latching

Availability: ○

Panel cut-out (page 119)

ERA.2C Fixed receptacle, nut fixing

Availability: ○

Panel cut-out (page 119)

ECP.2C Fixed receptacle with two nuts (back panel mounting)

Availability: ○

Panel cut-out (page 119)

ECP.2C Fixed receptacle with two nuts, straight contact for printed circuit (back panel mounting)

Availability: ○

Panel cut-out (page 115)

PCB drilling pattern (page 119)

Note: All dimensions are in millimeters.

EEP.2C Fixed receptacle, nut fixing (back panel mounting)

Availability: ○

Panel cut-out (page 119)

ERY.2C Fixed receptacle, protruding shell, (screw fixing on the panel)

Availability: ○

Panel cut-out (page 119)

PCA.2C Free receptacle, cable collet

Availability: ○

PCA.2C Free receptacle, cable collet and nut for a bend relief

Availability: ○

Note: The bend relief must be ordered separately (see page 137).

PSA.2C Fixed receptacle nut fixing, cable collet

Availability: ○

Panel cut-out (page 119)

Note: All dimensions are in millimeters.

Watertight or vacuum-tight models

HGP and HEP receptacles allow the device on which they are fitted to reach a protection index of IP68 as per IEC 60529. They are fully compatible with plugs of the same series and are widely used for portable radios, military, laboratory equipment, aviation, etc. These models are identified by a letter «P» at the end of the reference. These models are also available in a vacuum-tight version. Such models are identified by an additional letter «V» at the end of the part number (certificate on request).

Epoxy resin is used to seal these models.

Part number example:

Watertight receptacle – HGP.2C.304.CLLP
Vacuum-tight receptacle – HGP.2C.304.CLLPV

Technical Characteristics

Mechanical and Climatic

Characteristics	Value	Standard

- Body material: Polyoxymethylene (POM) grey (or black)
- Cord material: Polyamide 6, white (or black)
- Gasket material: Silicone rubber
- Maximum operating temperature: 212° F
- Watertightness: IP61 according to IEC 60529

BFG Plug caps

Part number	Series	Dimensions (mm)				Availability
		A	B	L	N	
BFG.00.100.PCSG	00	7.5	10	10.0	60	○
BFG.0B.100.PCSG	0S-0B	9.5	12	12.2	85	○
BFG.1B.100.PCSG	1S-1B	12.0	15	13.8	85	○
BFG.2B.100.PCSG	2S-2B	15.0	18	15.0	85	○
BFG.3B.100.PCSG	3S-3B	18.5	22	18.5	95	○

Note: This cap is available only with an alignment key (G). Upon request this cap can be supplied in black and the last letter «G» of the part number should be replaced with «N».

Fitting the cord

Slide the plug into the loop of the cord. Place the loop into the groove in front of the collet nut and tighten the loop.

BFA Plug caps

Part number	Series	Dimensions (mm)				Availability
		A	B	L	N	
BFA.4S.100.NAS	4S	25.0	10	22.0	120	○
BFA.5S.100.NAS	5S	36.0	10	30.0	150	○
BFA.6S.100.NAS	6S	46.0	10	33.0	150	○

Note: The last letter «S» of the part number corresponds to the alignment key of the plug. The last letter «S» of the part number stands for the material of the O-ring (silicone rubber). O-rings made from FPM are also available; if required, replace the letter «S» by «V».

- Body material: Nickel-plated brass (Ni 3µm)
- Lanyard material: Stainless steel
- Crimp ferrule material: Nickel-plated brass + polyolefin
- O-ring material: Silicone rubber or FPM
- Maximum operating temperature: 275° F

BFG Plug caps with key (G)

Part number	Series	Dimensions (mm)				Availability
		A	B	L	N	
BFG.4B.100.NAS	4B	25.0	10	20.0	120	○
BFG.5B.100.NAS	5B	36.0	10	27.0	150	○

Note: This cap is available only with an alignment key (G). The last letter «S» of the part number corresponds to the alignment key of the plug. The last letter «S» of the part number stands for the material of the O-ring (silicone rubber). O-rings made from FPM are also available; if required, replace the letter «S» by «V».

- Body material: Nickel-plated brass (Ni 3µm)
- Lanyard material: Stainless steel
- Crimp ferrule material: Nickel-plated brass + polyolefin
- O-ring material: Silicone rubber or FPM
- Maximum operating temperature: 275° F

- Body material: Nickel-plated brass (Ni 3µm)
- Lanyard material: Stainless steel
- Crimp ferrule material: Nickel-plated brass + polyolefin
- O-ring material: Silicone rubber or FPM
- Maximum operating temperature: 275° F

BHG Plug caps, nut fixing or flange

Part number	Series	Dimensions (mm)				Availability
		A	B	L	N	
BHG.4B.100.NAS	4B	25.0	10	20.0	120	○
BHG.5B.100.NAS	5B	36.0	10	27.0	150	○

Note: This cap is available only with an alignment key (G). The last letter «S» of the part number corresponds to the alignment key of the plug. The last letter «S» of the part number stands for the material of the O-ring (silicone rubber). O-rings made from FPM are also available; if required, replace the letter «S» by «V».

- Body material: Polyoxymethylene (POM) grey (or black)
- Cord material: Polyamide 6, white (or black)
- Gasket material: Silicone rubber
- Maximum operating temperature: 212° F
- Watertightness: IP61 according to IEC 60529

BRA Blanking caps for fixed receptacles and free straight receptacles

Part number	Series	Dimensions (mm)					Availability
		A	B	L	M	N

Note: On request this cap is available in black. If required, replace the last letter «G» of the part number by «N».

Fitting the cord

Slide the receptacle into the loop of the cord.
Place the loop into the groove in front of the collet nut.
Tighten the loop.

- Body material: Nickel-plated brass (Ni 3 µm)
- Lanyard material: Stainless steel
- Crimp ferrule material: Nickel-plated brass + polyolefin
- O-ring material: Silicone rubber or FPM
- Maximum operating temperature: 275° F
- Watertightness: IP61 according to IEC 60529

GM● Bend relief (Polyurethane)

A bend relief made from thermoplastic polyurethane elastomer (Desmopan 786) can be fitted over LEMO plugs and receptacles that are supplied with a specially fitted nut. They are available in nine different colors that match with the GRA insulating washers (see page 140).

Use the part numbers shown below to order this accessory separately.

Main characteristics

- Material: Polyurethane elastomer
- Temperature range in dry atmosphere: -40° F to +176° F

See also detailed information for each series: B series on page 55; S series on page 110.

● Standard, typically 0-6 weeks delivery for quantities of 250 or less.

○ Non-standard product, contact LEMO USA, typically 6-12 weeks delivery for quantities of 250 or less.

Non-standard product is defined as any product which contains one or more components which are not standard.

Data Subject to Change

GMA Bend relief (Silicone)

A bend relief has been designed for connectors used in applications at high temperature or requiring vapor sterilization.

These bend reliefs are different from previous ones; their material, a silicone elastomer, is noted for its retention of flexibility over a wide temperature range. They are available in nine colors.

Use the part numbers shown below to order this accessory separately.

Main characteristics

- Material: Silicone elastomer VMQ
- Temperature range in dry atmosphere: -106° F to +392° F
- Temperature range in water steam: +284° F
- Inflammability: not flammable (no UL classification)

GM● Overall protective covering with bend relief for plugs and receptacles

Overall protective coverings with bend relief, type GMF for plugs and GMP for receptacles offer optimum protection against mechanical damage and give a protection index of IP65 according to IEC 60529 (mated position). These overall protective coverings with bend relief slide easily over the connector shell and are positioned by slightly pressing the bend relief backnut.

The special design of the overall protective covering for plugs provides for easy use of the push-pull self-latching system.

GMF Overall protective covering for plug

Reference		Dimensions (mm)				Availability

GRA Insulating washers

Receptacles or plugs mounted on panels can be fitted with insulating washers. The nine colors available combined with those for the overall protective coverings with bend relief makes color coding possible.

Part number	Series	Dimensions (mm)							Availability
		A	B	E	L	M	S	T	
GRA.00.269.GG	00	10	8.8	4.5	1.8	1.0	6.4	8.0	●
GRA.0S.269.GG	0S-0B	12	10.8	6.0	1.8	1.0	8.3	9.9	●
GRA.1S.269.GG	1S-1B	16	13.8	6.5	1.8	1.0	10.6	12.2	●
GRA.2S.269.GG	2S-2B	21	17.8	7.3	2.2	1.2	13.6	16.2	●
GRA.3S.269.GG	3S-3B	25	21.8	10.3	2.2	1.2	16.6	20.2	●
GRA.4S.269.GG	4S-4B	32	28.8	10.5	2.5	1.5	23.7	27.2	○

Note: Insulating washers for series 5B are available on request.

Caution: These insulating washers can be used with fixed and straight receptacles with across flat dimension S1 equivalent to the S dimension of the washer.

Ref.	Color	Ref.	Color
A	blue	N	black
B	white	R	red
G	grey	S	orange
J	yellow	V	green
M	brown		

Note: The last letter «G» of the part number indicates the color grey for the insulating washer. To obtain an insulating washer of another color, refer to the table above and change the letter «G» of the part number to the corresponding letter of the color required.

For the panel cut-out, please consult section «Panel cut-out» on page 150.

- Material: Polyamide
- Maximum operating temperature: 194° F

GRC Double panel washers

Double panel washers have been designed to make the drilling of panel holes easier for mounting fixed and straight receptacles. The combination of the nine different colors of the double panel washers and of the overall protective coverings with bend relief makes color coding possible.

Part number	Series	Dimensions (mm)								Availability
		B	E	H	L	M	N	R	S	
GRC.0S.260.HG	0S-0B	10.9	5	14	2.5	1.5	26.5	12.5	8.3	○
GRC.1B.260.HG	1S-1B	13.9	5	20	3.3	1.8	34.5	14.5	10.6	○

Caution: These double panel washers can be used with fixed or free receptacles with across flat dimension S1 equivalent to the S dimension of the washer.

Ref.	Color	Ref.	Color
A	blue	N	black
B	white	R	red
G	grey	S	orange
J	yellow	V	green
M	brown		

Note: The last letter «G» of the washer's part number indicates the color grey. For other colors, refer to the above table and replace letter «G» by the one corresponding to the color required.

For the panel cut-out, please consult chapter «Panel cut-out» on page 150.

- Material: Nickel-plated bronze (3 µm)

Pneumatic crimping tools

Supplier	Part number
LEMO	DPC.91.701.C
BALMAR	85230
BUCHANAN	621101

According to specification
MIL-C-22520/7-01.
For LEMO contacts \varnothing 0.5-0.7-0.9-1.3 mm

male

female

These positioners are suitable for use with both manual and pneumatic crimping tools according to the MIL-C-22520/7-01 standard.

Fig. 1

Fig. 2

Note: A wide variation of strand number and diameter combinations are quoted as being AWG, some of which do not have a large enough cross section to guarantee a crimp as per either MIL-C-22520/1-01 or /7-01. Our technical department is at your disposal to study and propose a solution to all your applications.

Cable fixing

Cables are fixed into LEMO connectors with cable collet systems. These collets with latches have a design which is very similar to those used for tool machines. This solution guarantees excellent cable retention and ensures perfectly symmetrical deformation of the cable.

The 00 multicontact series is also available with hexagonal crimping (MIL-C-22520F).

Material and treatment

Component	Material (standard)	Surface treatment (µm)				
		Nickel		Gold		
		Cu	Ni	Cu	Ni	Au
Center piece	Brass (UNS C 38500)	0.5	3	–	–	–
Collet	Brass (UNS C 38500)	0.5	3	–	–	–
Crimp ferrule	Copper (UNS C 18700)	0.5	3	0.5	3	0.5
Reducer	Brass (UNS C 38500)	0.5	3	–	–	–
Reducing cone	Brass (UNS C 38500)	0.5	3	–	–	–
Grounding cone	Brass (UNS C 38500)	0.5	3	–	–	–
Metal washer	Brass (UNS C 38500)	0.5	3	–	–	–
Gasket	Silicone MQ/MVQ	–				
	FPM (Viton®)					

Notes:

Standards for surface treatment are as follows:
Nickel-plated: FS QQ-N-290A.

Cable clamping

Type C cable clamping (S and 2C series)

This system includes an grounding center-piece ③ or ④ and a collet ② which is compressed by the collet nut ① to ensure a good clamping to the cable. When assembling the cable, the cable shield is gripped between the grounding center-piece and the collet. The grounding center-piece design depends on the connector type:

- In one single part with opening ③ for S and E series single contact and multicontact series with contacts only on the circumference of the insulator;
- In two parts ④ for multicontact type connectors with contacts on the circumference and the center of the insulator.

Type D cable clamping (FFL model 2S series)

This clamping system is assembled onto FFL plugs designed for crimp contacts. It includes the same components as the B series, see page 160.

Type L cable clamping (S and 2C series)

This clamping system which includes in one part ② the center-piece and the collet, does not make it possible to connect the cable shield to the connector shell. It is delivered only upon request and can only be assembled onto single contact or multi-contact type connectors. This is the only possible clamping type for the 5S.112 type.

Type K cable clamping (S series)

This clamping system provides for screened or unscreened cables with diameters larger than maximum specified for each series. It includes an oversize collet housing ⑩, the collet ② and the collet nut ① of the next series size up. It requires a long-er split center-piece ④.

Type E cable clamping (00 single contact series)

This clamping type is specified only for the single contact 00 series. The rear end of the crimp backnut ④ which receives the shield braid is knurled to ensure a good retention of the shield once crimped under the crimp ferrule ①.

Type D cable clamping (B and 2G series)

This clamping system includes two split insert carriers ④ which position the insulator into the connector and a collet ② which is compressed by the collet nut ① ensuring the cable clamping. When assembling the connector, the cable shield is clamped between the split insert carrier and the collet.

Type M cable clamping (B series)

This clamping system is adapted to cables with a diameter smaller than the smallest diameter specified for each series. It includes a reducer ^⑫, a collet of a smaller series ^② and a reducing cone ^⑪. These parts have the same function as the D type collet.

● Terms and Conditions

1. **Acceptance:** If Buyer's order contains written, printed or stamped provisions or conditions inconsistent with the written, printed or stamped provisions of this Agreement attached hereto, the provisions and conditions of this Agreement shall prevail. Buyer shall contact LEMO USA within 10 days of receipt of LEMO USA Terms and Conditions if any objection is raised. Failure of Buyer to timely object shall be deemed an acceptance by Buyer of LEMO USA's Terms and Conditions. If a timely objection is raised by the Buyer to the LEMO USA Terms and Conditions, the order(s) will not be entered until agreement in writing is reached. All orders are subject to acceptance by Seller. Seller's acceptance is expressly conditional upon Buyer's acceptance of LEMO USA Terms and Conditions.
2. **Pricing:** Prices are based on continuous manufacture rates of delivery specified. Buyer will be charged any direct additional cost to which Seller is put by reason of any interruption of production due to Buyer's request, act or default.
3. **Applicable Law:** Purchase Order is subject to the applicable provisions of the Uniform Commercial Code, under the laws of the State of California.
4. **Buyer's Liability:** Buyer is liable for all costs associated with completed units, shipped or unshipped, labor and materials on work in process, and raw materials on hand and/or specific to Buyer's Order and all reasonable direct damages, for lead time specified in advance of requested date of cancellation.
5. **License:** The submission of a quotation or order acknowledgment does not grant or imply a license under any patents now owned or controlled by Seller, or which may become owned or controlled by Seller.

6. **Buyer's Default:** In the event Buyer cancels the contract embodied by Buyer's Order and this acceptance thereof, in whole or in part, or such contract is canceled by Seller because of default by the Buyer, the Buyer shall pay Seller by reason of such cancellation or default for reasonable direct damages sustained, including costs associated with completed units, shipped or unshipped, labor and materials on work in process, and raw materials on hand and/or specific to Buyer's Order and all reasonable direct damages, for lead time specified in advance of requested date of cancellation, at the current price applicable to the total quantity ordered at the time of default. Notwithstanding the foregoing, if item or items ordered are NON-CANCELABLE/NON-RETURNABLE, the Buyer shall purchase 100% of quantity ordered.

In the event Seller does not meet the confirmed delivery date agreed to with the Buyer as evidenced in writing, Seller shall be allowed one opportunity to reschedule the delivery and Buyer shall not be entitled to cancel the Order for such reason. In the event Seller does not meet said rescheduled delivery, Buyer may cancel the Order and not be in default under the Agreement, including the terms of this Section 6.

7. **Indemnity:** Buyer hereby specifically agrees to save Seller harmless and indemnify Seller against all claims for damage or profits and for all costs and attorney fees incurred by Seller resulting from any suit or suits arising from alleged infringements of patents, design copyrights, or trademarks with respect to all goods manufactured, either in whole or in part, to Buyer's specifications.

Seller, at its expense, will defend Buyer and its customer against any reasonable and good faith claim based on an allegation that an unaltered LEMO USA product infringes a patent or copyright of another; provided however, that no such obligation shall apply to (i) any LEMO USA product manufactured to Buyer's specifications and/or designs or (ii) any product that has been modified, altered, misused or damaged by Buyer or a third party. Seller shall pay any reasonable resulting costs, damages and attorney's fees finally awarded against Buyer or its customer that are attributable to such claim or will pay the part of any settlement that is attributable to such claim, provided that: (a) Buyer notifies Seller promptly in writing of the claim; (b) Seller is permitted to control the defense or settlement of the claim; and (c) Buyer and its customer cooperate reasonably in such defense or settlement.

8. **Returns:** All NON-CANCELABLE/NON-RETURNABLE products shall not be returned. Subject to Section D, Subsection 3 of the Distribution Agreement, If Buyer intends to return standard product, a return authorization number is required prior to return shipment and the product may be subjected to a restocking fee. Seller reserves the right not to issue a return authorization. Product must be returned (with shipping costs prepaid) in original packaging and in original condition as when purchased, undamaged, not reconfigured, not obsolete, fit for use, and shall not have been previously shipped from Seller to Buyer or its customer more than one year prior to the date of return. Seller reserves the right to not accept damaged product for credit, replacement, or substitution. If damaged product is accepted by Seller for credit, and damage is caused by the negligence of the Buyer, the Buyer will pay all costs for refurbishment of damaged product. Discovery of product defect and return of product shall be made in the period of time following delivery as provided in the applicable sections of the Uniform Commercial Code. In the event of a return, Seller shall have the right, in its sole discretion, to replace, substitute, or issue a credit to Buyer.
9. **Payment:** All invoices are delinquent at 30 days past invoice date and will be subject to 1% per month finance charge. Overdue accounts may be placed on credit hold and shipments held. Buyer agrees to pay all reasonable collection charges, including attorney fees, in the event his account is delinquent more than 30 days.
10. **Payment Taxes:** In the event any sales tax, manufacturer's tax, or other tax is applicable to any shipment made by the Buyer on Buyer's order, such tax shall be added to the selling price and shall be paid by the Buyer.

Data Subject to Change

- 11. Title/Risk of Loss:** All prices are F.O.B. Rohnert Park, California, 1% 10 days/Net 30 days and all Seller obligations hereunder are completed when Seller delivers the items, properly consigned, to a common carrier, Seller's delivery to such carrier shall constitute delivery thereof to the Buyer.
- 12. Warranties:** Seller warrants to Buyer that the Goods will conform to the applicable drawings or design standards. The express warranty set forth in this agreement is exclusive and is in lieu of all other express or implied warranties, but not limited to, warranties of merchantability and fitness for a particular purpose.
- EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE SELLER DISCLAIMS ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, ANY IMPLIED WARRANTIES, WARRANTIES OF MERCHANTABILITY AND WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE OR USE.
- 13. Disputes and Resolution; Attorney's Fees:** The parties agree that any disputes or questions arising hereunder including the construction or application of the Agreement, including these Terms and Conditions shall be settled in the State of California, according to the laws of the State of California. The parties hereto hereby consent to jurisdiction and venue in the Superior Court of Sonoma County, California, and in the Federal District Court for the Northern District of California, with respect to all disputes or disagreements under the Agreement, including these Terms and Conditions and agree that any action with respect to any of the foregoing shall be brought and maintained only in such courts sitting in the Northern District of California or Sonoma County, as appropriate. In any court action at law or in equity, which is brought by one of the parties to enforce or interpret the provisions of the Agreement, including these Terms and Conditions, the prevailing party will be entitled to costs and reasonable attorney's fees, in addition to any other relief to which that party may be entitled.
- 14. Confidentiality:** Both parties acknowledge that during the course of business, each may obtain confidential information regarding the other party's business. Both parties agree to treat all such information as confidential and to take all reasonable precautions against disclosure of such information to unauthorized third parties during and for five (5) years after the term of all orders. Upon request by an owner, all documents relating to the confidential information will be returned to such owner.
- 15. Assignment:** It is agreed by the parties that there will be no assignment or transfer of any order or any interest in any orders. Action by a party in violation of this provision will dismiss the other party from any further obligations arising from any orders.
- 16. Entire Terms & Conditions:** These Terms & Conditions, together with the Agreement contain the entire agreement of the parties and there are no other promises or conditions in any other agreements whether oral or written. This document, together with the Agreement, supersedes any prior written or oral agreements between the parties.
- 17. Amendment:** These Terms & Conditions may be modified or amended if the amendment is made in writing and is signed by both parties; provided however, that the terms of the Agreement shall control in any case where there is a conflict between these Terms & Conditions and the Agreement.
- 18. Severability:** If any provision of these Terms & Conditions shall be held to be invalid or unenforceable for any reason, the remaining provisions shall continue to be valid and enforceable. If a court finds that any provision is invalid or unenforceable, but that by limiting such provision it would become valid and enforceable, then such provision shall be deemed to be written, construed and enforced as so limited.
- 19. Waiver of Contractual Right:** The failure of either party to enforce any provision of these Terms & Conditions shall not be construed as a waiver or limitation of that party's right to subsequently enforce and compel strict compliance with every provision of this Contract.
- 20. Limitation on Damages:** Buyer's consequential or incidental damages for any Seller breach of the contract, except for Seller's gross negligence or willful misconduct, will be limited to the purchase price. Subject to Section 7 hereof, Seller will have no liability to Buyer for any damages, losses, liabilities, injuries, claims, demands or expenses arising out of or directly or indirectly connected with the use of the product. Seller shall not be liable for any exemplary, indirect, incidental, or consequential damages sustained or incurred in connection with the use of the product regardless of the form of action, whether in contract, tort (including negligence) or strict liability.

SELLER SHALL NOT BE LIABLE FOR ANY DAMAGES DUE TO CAUSES BEYOND THE REASONABLE CONTROL OF SELLER OR ATTRIBUTABLE TO ANY SERVICE, PRODUCTS, OR ACTIONS OF ANY PERSON OTHER THAN SELLER REGARDLESS OF THE FORM OF ACTION AND WHETHER OR NOT SUCH DAMAGES ARE FORESEEABLE.

NEITHER PARTY SHALL BE LIABLE IN ANY WAY TO THE OTHER PARTY FOR DELAYS, FAILURE IN PERFORMANCE, OR LOSS OR DAMAGE DUE TO FORCE MAJEURE CONDITIONS SUCH AS: FIRE; LIGHTENING; STRIKE; EMBARGO; EXPLOSION; POWER SURGE OR FAILURE; ACTS OF GOD; WAR; TERRORIST ATTACKS, LABOR DISPUTES; CIVIL DISTURBANCES; ACTS OF CIVIL OR MILITARY AUTHORITY; INABILITY TO SECURE MATERIALS, FUEL, PRODUCTS OR TRANSPORTATION FACILITIES; ACTS OR OMISSIONS OF SUPPLIERS, OR ANY OTHER CAUSES BEYOND ITS REASONABLE CONTROL, WHETHER OR NOT SIMILAR TO THE FOREGOING.

● Product Safety Notice

PLEASE READ AND FOLLOW ALL INSTRUCTIONS CAREFULLY AND CONSULT ALL RELEVANT NATIONAL AND INTERNATIONAL SAFETY REGULATIONS FOR YOUR APPLICATION. IMPROPER HANDLING, CABLE ASSEMBLY, OR USE OF CONNECTORS CAN RESULT IN HAZARDOUS SITUATIONS.

1. SHOCK AND FIRE HAZARD

Incorrect wiring, the use of damaged components, foreign objects (such as metal debris), and / or the presence of residue (such as cleaning fluids), can result in short circuits, overheating, and / or risk of electric shock. Mated components should never be disconnected while live as this may result in an exposed electric arc and local overheating, resulting in possible damage to components.

2. HANDLING

Connectors and their components should be visually inspected for damage prior to installation and assembly. Suspect components should be rejected or returned to the factory for verification. Connector assembly and installation should only be carried out by properly trained personnel. Proper tools must be used during installation and / or assembly in order to obtain safe and reliable performance.

3. USE

Connectors with exposed contacts should never be live (or on the current supply side of a circuit). Under general conditions voltages above 30 VAC and 42 VDC are considered hazardous and proper measures should be taken to eliminate all risk of transmission of such voltages to any exposed metal part of the connector.

4. TEST AND OPERATING VOLTAGES

The maximum admissible operating voltage depends upon the national or international standards in force for the application in question. Air and creepage distances impact the operating voltage; reference values are indicated in the catalog however these may be influenced by PC board design and / or wiring harnesses. The test voltage indicated in the catalog is 75% of the mean breakdown voltage; the test is applied at 500 V/s and the test duration is 1 minute.

5. CE MARKING

CE Marking is applied to a complete product or device, and implies that the device complies with one or several European safety directives. CE Marking can NOT be applied to electromechanical components such as connectors.

6. PRODUCT IMPROVEMENTS

The LEMO Group reserves the right to modify and improve to our products or specifications without providing prior notification.

● Design Engineering Services

DATE: _____

LEMO creates custom designs to fit your unique application, ranging from connector to multi-component assemblies.

- **Custom Connectors** – Precision designs tested to your specifications
- **Cable Assembly** – Electronic and hybrid fiber optic cable assemblies to meet a wide variety of demanding applications
- **Cable Assembly Integration** – Consultation on routing of cable and connections within your product
- **Rapid Prototyping** – Onsite engineering and rapid prototyping capabilities to assist in the high demands of product development
- **Pro/ENGINEER®** 3D solid CAD models available

Manufacturing Services

Outsource your manufacturing challenges. LEMO's capable engineering staff can create solutions for your cable assembly or component sub-assembly designs.

- **Cable Assembly** – Expertise in both electronic and fiber optic connector termination
- **Overmolding Design and Manufacture** – Custom overmold designs to enhance aesthetics while providing durability and strength
- **Sub-Assembly Build** – Combine our connectors and cable assemblies with your sub-assemblies to provide a tested and proven module
